ANRE - EnR Network Presidency 2017

The European Energy Network EnR is a voluntary network of national energy agencies within Europe and in neighbouring countries. Established in Strasbourg in 1991, EnR currently numbers 24 member agencies, each one with national responsibility for promoting and actively contributing to energy efficiency, renewable energies and environmental protection.

Starting February 2017, the EnR Presidency & Secretariat for one-year period is assured by ANRE (Romania).

The EnR management is jointly formed by the EnR Presidency & Secretariat and the EnR Troika. The EnR network Troika consists of mandated agency representatives for the previous (DENA Germany), current (ANRE Romania) and next Presidencies (ENEA Italia).

Focus topic : Energy poverty in EUROPE and MS – benchmarking of the relevant documents and reports and *Clean Energy Package* proposals

EnR Presidency 2017

ANRE workplan – what we planned

- ☐ Increase EnR visibility
- ☐ Enhance EnR cooperation (European Commission, World Energy Council, Environment Protection Agencies - EPA Network, etc)
- ☐ Collaboration between WG (Chairs) and EnR Full and Regular Members
- ☐ EnR new members : HEA application and Malta correspondence
- ☐ Focus topic : **Energy poverty in EUROPE and MS** – benchmarking of the relevant documents and reports and *Clean Energy Package* proposals

Energy poverty in EU

Energy poverty is a major challenge across the EU, having its roots in low incomes and energy inefficient housing. The EU Survey on Income and Living Conditions (EU SILC) estimates that 54 million European citizens (10.8% of the EU population) were unable to keep their home adequately warm in 2012, with similar numbers being reported with regard to the late payment of utility bills or presence of poor housing conditions.

The Commission's energy efficiency proposals *Clean Energy for all Europeans* package ask Member States to take energy poverty into account, by requiring a share of energy efficiency measures to be implemented as a priority in households affected by energy poverty or in social housing.

Also, as part of the Energy Union Governance process, Member States will have to monitor and report on energy poverty while the Commission will facilitate the exchange of best practices.

The Commission is also setting up starting January 2018 an Energy Poverty Observatory to provide better data on the problem and its solutions as well as to help Member States in their efforts to combat energy poverty.
