## From LTRS to Building Renovation Plans What changes?

Long term renovation strategies (LTRS) are a key instrument to renovate Europe's building stock into a highly energy efficient and decarbonised building stock by 2050. During the transposition of the emended Energy Performance of Buildings Directive (EPBD), Member-States had to create an overview of the national building stock, define policies and actions to stimulate deep renovation, define progress indicators and indicative milestones for 2030, 2040 and 2050, as to estimate expected saving and wider benefits. These provide the ideal context to evaluate and share experiences within the EnR Buildings Working Group (BWG), especially at the challenges implementing policies and actions as to monitor them, which will be in the first line of discussions inside the BWG.

This event focusses on the implementation and monitoring processes of current LTRS and the role of Energy Agencies in assisting the effective renovation of the building stock. This will be the touchstone for a discussion on the need to update the LTRS to a National Building Renovation Plan (NBRP) in line with the Commission's proposal for the revised EPBD. These plans will establish specific timelines for achieving higher energy performance classes, in line with member state countries' pathway to achieve zero-emission building stock by 2050. NBRPs will also present an overview of national policies and measures empowering and protecting vulnerable households, ensuring housing affordability. They will also ensure a coherent deployment of funds, identifying key areas and putting in place the most adequate instruments.

# European Energy Network

A voluntary network of European energy agencies

## Title

**25<sup>th</sup> October 2022 | Online | Agenda** (All times CEST: [Check the time in your time zone](#))

10:15 – 10:30 | Welcome e-coffee

## Opening Session

10:30 – 10:40 | **Nelson Lage** | President of the Board of Directors, ADENE & President of EnR 2022

10:40 – 10:50 | **Rui Fragoso** | Buildings Working Group chair, ADENE

## LTRS 1st year checkpoint

10:50 – 11:00 | Energy Agencies' role in LTRS – 1<sup>st</sup> years of implementation | **João Cleto**, ADENE

11:00 – 11:40 | Focus on countries' LTRS – presentations from EnR Agencies

11:40 – 11:50 | Quick reactions to countries LTRS state of the art – panel discussion

## From LTRS to National Building Renovation Plans – What changes and how to do it?

11:50 – 12:10 | From LTRS to Building Renovation Plans | **Dimitrios Athanasiou**, DG ENER

12:10 – 12:30 | Panel discussion

*How to go from LTRS to National Building Renovation Plans? How do REpowerEU and the Council regulation to reduce gas consumption impact these strategies? How do member states emergency action plans guarantee affordable, secure and sustainable energy in buildings? How to ensure NBRPs effectively address vulnerable households and relevant funding mechanisms?*

## Closing session

12:30 – 12:35 | Closing remarks | **Rui Fragoso** | Buildings Working Group chair, ADENE

# European Energy Network

A voluntary network of European energy agencies

## About the European Energy Network (EnR)

EnR is a voluntary network currently numbering twenty-four European energy agencies, with responsibility for the planning, management or review of national research, development, demonstration or dissemination programmes in the fields of energy efficiency and renewable energy and climate change abatement. It seeks to strengthen cooperation between member agencies and other European actors on all issues relevant to sustainable energy (energy efficiency, sustainable transport and renewable energy). International comparison and information sharing takes place primarily through our eight Working Groups, which are also open to relevant non-member organisations. As well as this exchange of information, EnR Working Groups serve as *fora* for the conception and implementation of successful common projects within the framework of EU-funded programmes.

EnR provides a first point of contact for national energy agencies in EU Member States. EnR dedicates its efforts towards joint activities where its unique character provides added value at both a European and individual Member State level. It provides a channel for pan-European technical support on matters of energy policy, strategy, evaluation, programme design & delivery and marketing communications.

**ADENE, Portuguese Energy Agency, holds the Presidency of the European Energy Network (EnR) in 2022.** During its annual mandate, ADENE aims to leverage the work undertaken by previous presidencies, laying out an ambitious agenda and contributing to public policy design that drives forward the energy and digital transition of the EU. The Portuguese Presidency of EnR will focus on five thematic areas:

- **Energy Poverty** | Contribute to achieve the goals set out in EU's European Green Deal and Renovation Wave, focusing on the role of renewable energies in the fight against energy poverty;
- **Renewable Energy Communities** – Contribute to implement the Clean Energy Package by promoting renewable energy communities, focusing on business models that can foster wider adoption;
- **Water-Energy Nexus** | Drive a more efficient use of resources through discussion around the water-energy nexus, focusing on innovative financing mechanisms and on consumer willingness-to-choose for combined savings' opportunities;
- **Green Jobs** | Contribute to strengthening sustainable competitiveness and the just transition to a green economy, by outlining market needs and solutions to implement new professional profiles;
- **International Cooperation** | Promote existing cooperation initiatives by EnR members and foster new synergies, with a focus on EU-Africa exchanges, encouraging discussion on multi-level governance models.

Underpinning the five thematic areas, ADENE will highlight three major axes (**youth, territories, and digitalisation**), that will be present in all activities to be developed, including several studies and publications, highlighting the role of energy agencies in the referred topics. These will contribute to the European energy and climate agenda, namely to #EUGreenDeal, #RenovationWave, #EUSkillsAgenda, #EUAfricaPartnership.

Nelson Lage, President of the Board of Directors of ADENE, presides the EnR Presidency 2022 and the Troika Plus 2022, composed by the current (ADENE, PT), past (ADEME, FR) and future (dena, DE) presidencies, and joined by a former presidency holder (RVO, NL).

Agência para a Energia

## About ADENE – Portuguese Energy Agency

ADENE is a private non-profit association with public utility, which develops its activity in the context of the public interest in the energy sector and its interfaces with other sectorial policies, articulated with other entities in this field, including energy efficiency, mobility, water efficiency and in the development of the nexus water-energy, under the tutelage of the Secretary of State for Environment and Energy and the Ministry of Environment and Climate Action. ADENE also has a major role as an aggregating institution that mobilises and dynamises the application of public policies, an excellent partner of the business and associative sector, close to the citizen, contributing to strengthen Portugal's position at the forefront of decarbonization and energy transition.
