## Plan for 2022-23 and feedback

- Review WG ToR
- Focus on a “hot topic” and dedicate a longer meeting for members to discuss in detail
- Members can struggle to motivate colleagues to attend regular online meetings (online meeting fatigue?)
- Revisit ecodriving programmes in a new EV dominated world and how a “just transition” can take place
- More focus on reducing traffic demand, behaviour change and active travel, use PEP as a basis going forward
