

Background EⁿR

- Established in 1990
- Voluntary network of “National” energy agencies with 26 members
- Information exchange, benchmarking and best practice, knowledge transfer, collaborative projects
- EⁿR acts as a bridge between national, regional & local activities and those of the European Community

- Rotating Presidency - current President: Netherlands Enterprise Agency (RVO)
- Troika management committee – Presidency supported by outgoing (EST/UK) and future (ADEME/FR) presidencies.

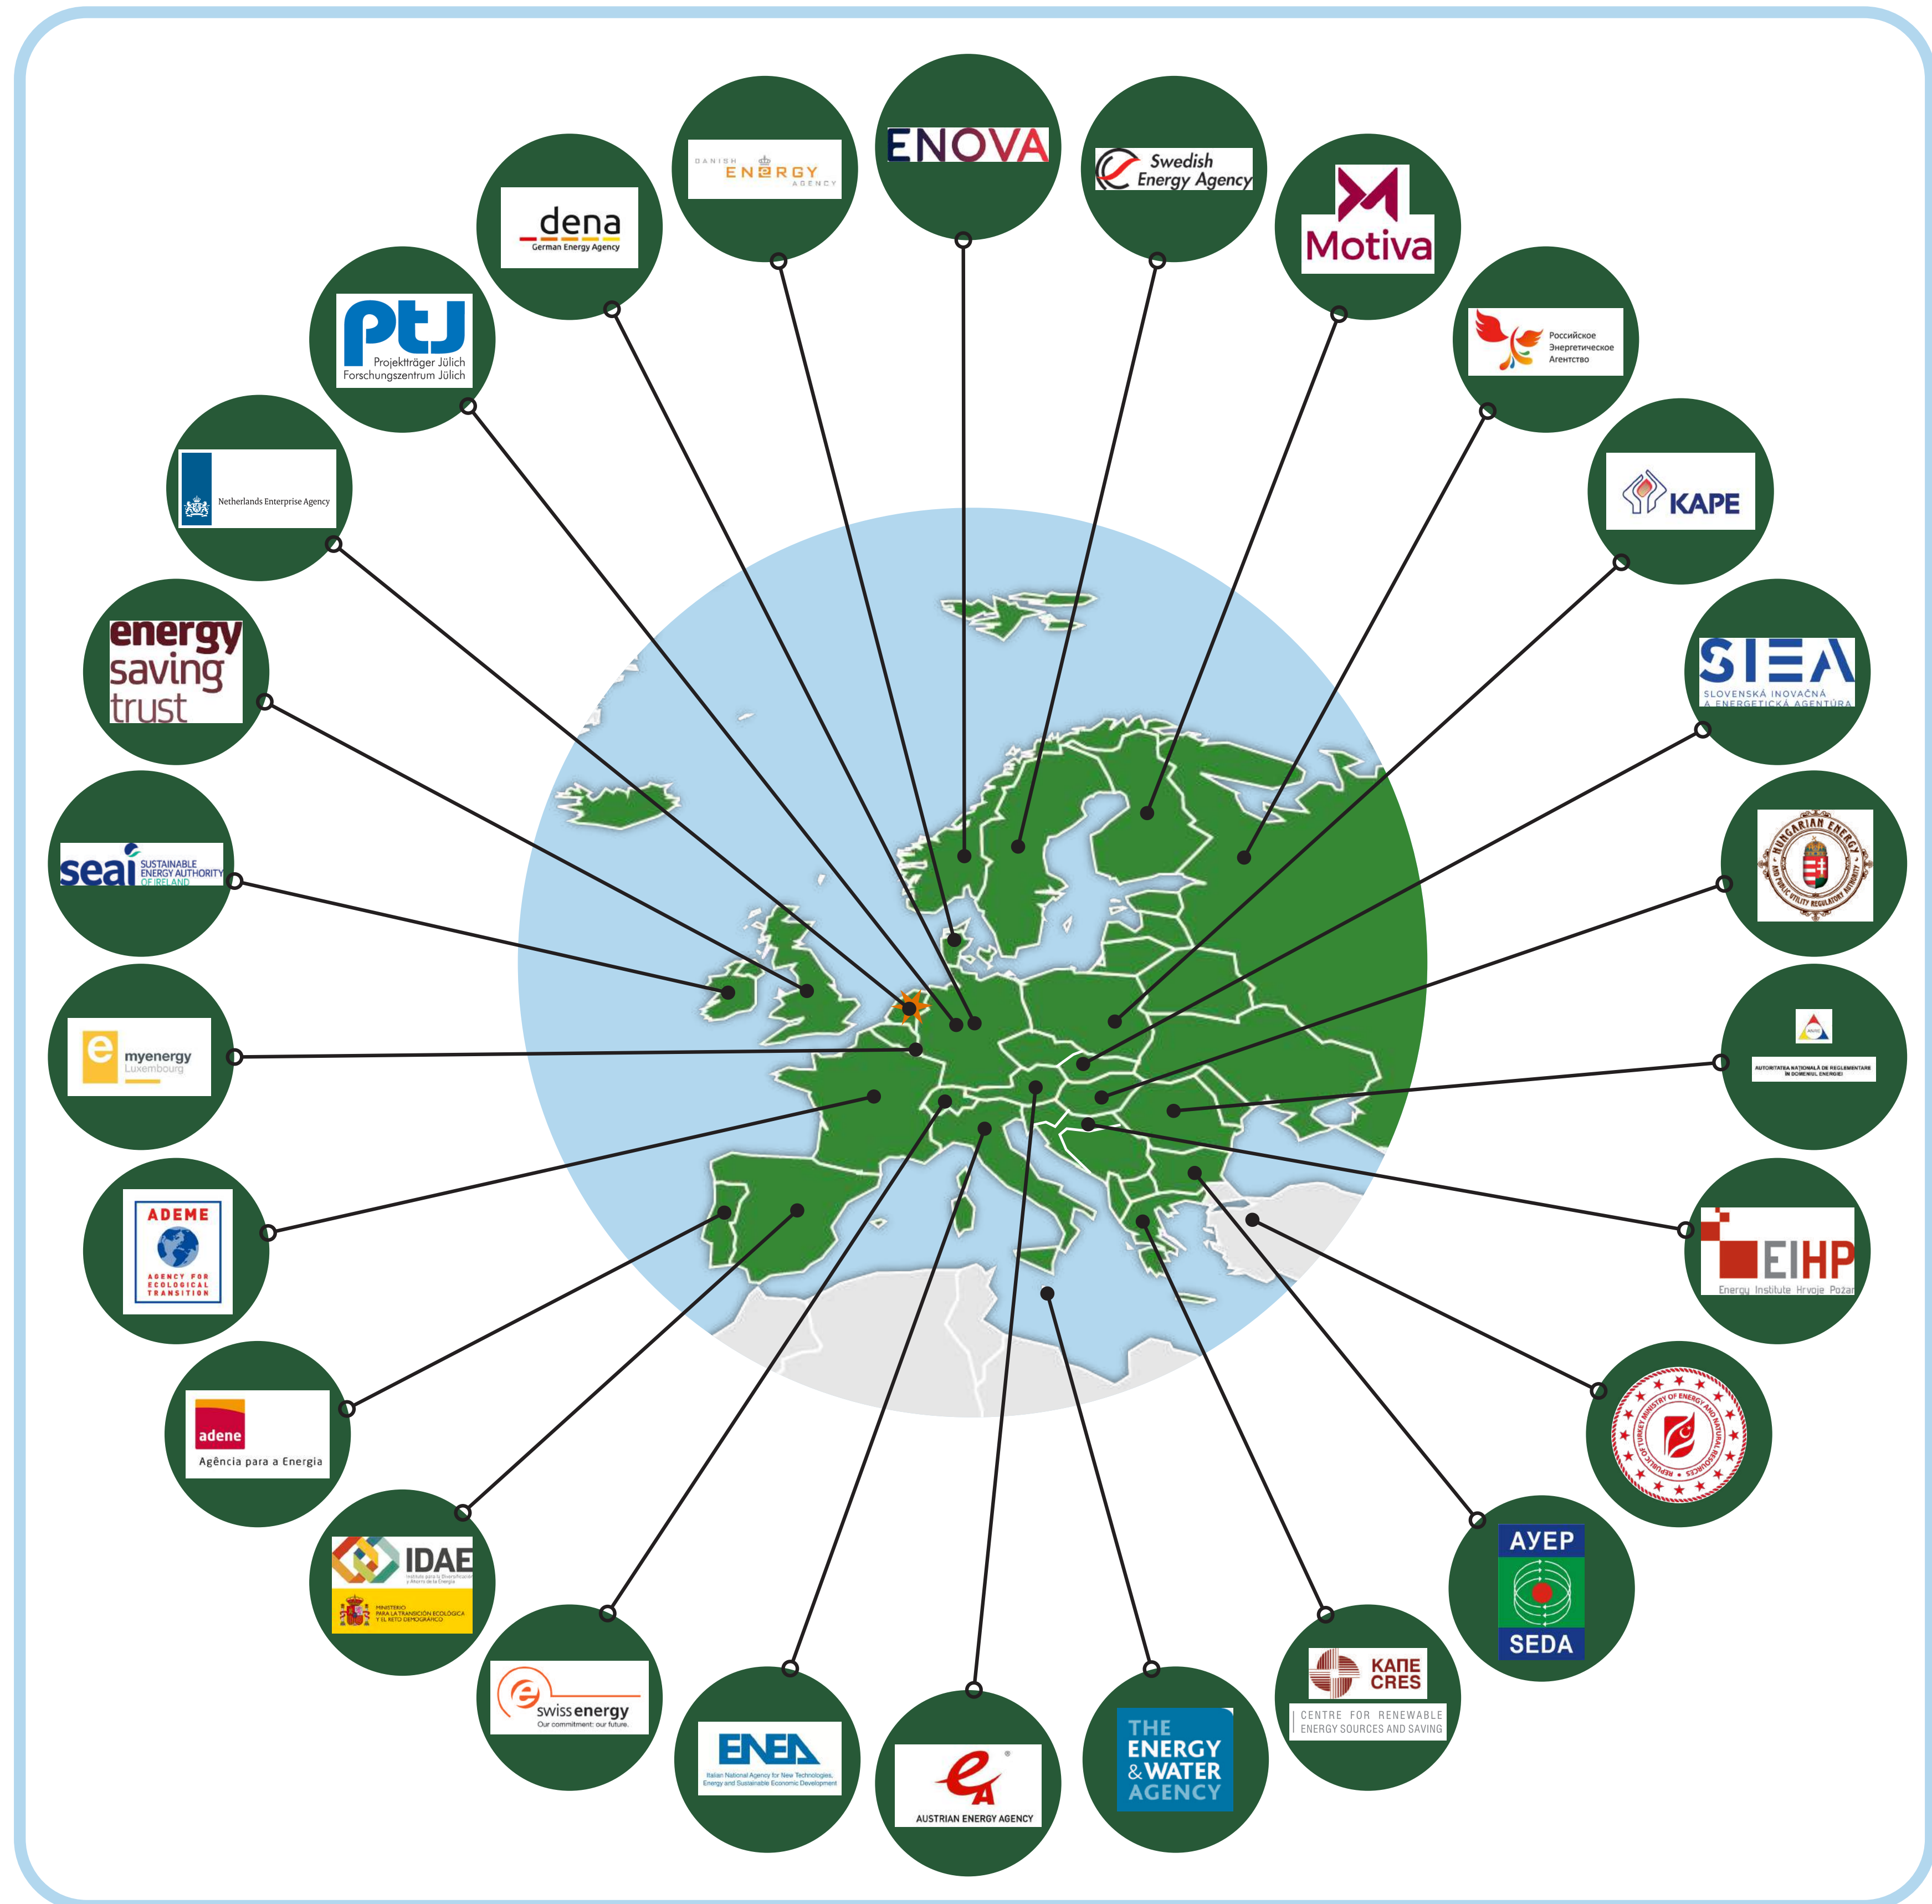

Troika+: in collaboration with ENEA (IT)

- Annual network & strategy meetings
- Eight thematic Working Groups

European Energy Network

The voluntary network of European Energy Agencies - at the heart of the clean energy transition

Some key elements of the Green Deal where EⁿR could play a role:

- Smart integration
- Accelerating the shift to sustainable and smart mobility, including a new mobility plan; aiming to deliver a million electric vehicle charging points by 2025
- A building renovation wave which will slash carbon emissions from Europe's buildings
- Just transition mechanism, including energy poverty: helping the most fossil-fuel-dependent communities adjust to a new green economy
- Circular economy: promotion of the development of a full circular economy where energy and waste is minimised in all types of products and services
- Monitoring and legislative review
- Behaviour change - raising awareness, educating and supporting citizens, businesses and municipalities on EE, RES & mobility issues

European Energy Network

The voluntary network of European Energy Agencies - at the heart of the clean energy transition

EⁿR added value

- 🔹 Unique perspective - IMPARTIAL, expert, consider issues through the lens of all our members
- ⊗ Ability to integrate concepts through the implementation of national, regional, local and institutional/public sector programmes
- ★ Robust existing structure to lead/ facilitate the unprecedented change initiated by the EU Green Deal
- 🌀 Exceptional convening power - informal sounding board to European Commission
- 🌿 Deep understanding of market and consumer needs in our respective countries
- ✳️ Cross sectoral, multi-disciplinary expertise
- 🏠 Practical experience of implementing government policies
- ⊗ Strong track record in collaboration & innovation - design and demonstrate new approaches, products & services
- 🌍 Promotion of European leadership in the energy transition on the global stage
