 - United Kingdom

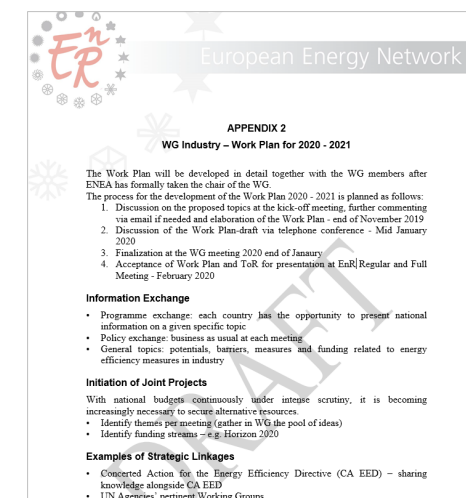

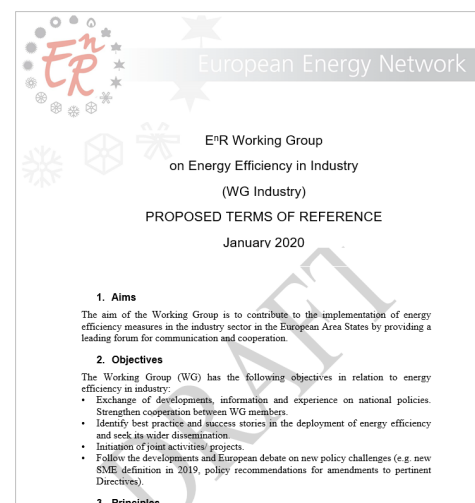

Knowledge sharing

Workplan and Terms of Reference revision (work in progress)

Inputs taken into account:

- Previous terms of reference
- IWG Survey carried out in 2018
- Proposals from participants

New IWG 2020-2021 objectives:

- Working accordingly to the members' real needs (expertise, time available).
- Three web-meetings per year plus possible sub-working groups on specific topics.
- Set up the conditions for the creation of a strong network of reliable experts.
- Set up the conditions for the duration of the IWG after 2021 and for a smooth handover after the present coordination.

LEAP4SME objectives:

- Exchange of developments, information and experience on national policies.
- Strengthen the cooperation between WG members.
- Dissemination of joint projects and initiation of joint activities/projects.

Several EnR National Energy Agencies involved + an experienced Brussels-based Communication firm

- 1) **Mapping and understanding** the complex context of national and local support to SMEs.
- 2) **Mobilising private stakeholders**, informing them of existing opportunities and involving them in the policy related actions during the entire project; within this context, **setting the conditions for a future smooth dialogue with policymakers**.
- 3) **Proposing effective and realistic solutions to policy makers and policy implementers** in terms of policy schemes, cross-cutting policy solutions embracing both energy and non-energy benefits, policy recommendations.
- 4) **Contributing**, through LEAP4SME research, analysis, and stakeholder involvement, **to the current debate on the assessment of a new definition for small and medium-sized enterprises** for the purposes of EED Article 8.

From the Workplan (draft)

Initiation of Joint Projects

Identify themes per meeting (gather in WG the pool of ideas)

Identify funding streams – e.g. Horizon 2020

Examples of Strategic Linkages

Concerted Action for the Energy Efficiency Directive (CA EED) – sharing knowledge alongside CA EED

UN Agencies' pertinent Working Groups

European Council for an Energy Efficient Economy (eceee), Industrial efficiency

Topics and Ideas

Financing tools

Energy management and energy audits (incl. qualification, accreditation and certification)

Sectoral studies (e.g. steel, food and beverage)

...Hints from the present EnR two days meeting (12-13 February 2020)

European Energy Network

Many thanks for your kind attention
